(54) Title: METHOD, SYSTEM AND RECEIVER FOR RECEIVING A MULTI-CARRIER TRANSMISSION

WO 2005/034460 A1

(57) Abstract: Mobile handheld terminals receiving DVB transmission require relatively low power consumption and TDM based transmission can be used to reduce power of the terminals. In order find pilot carrier position at least one symbol is accessed which is adapted to establish a correspondence pattern for pilot carriers in a matrix of the symbols. Carriers of the symbol are power accumulation summed within the matrix for determining a power accumulation sum maximum for indicating a pilot carrier position.
